

Art Unit: 1654

Interview Summary

The Examiner proposed the following amendment to claim 12:

12. (Currently Amended) An isolated polypeptide ~~having a length of up to 30 amino acids capable of binding to dendritic cells wherein said polypeptide comprises a peptide~~ comprising a sequence selected from the group consisting of PSNST (SEQ ID NO: 8), PPNTT (SEQ ID NO: 9), STPPNTT (SEQ ID NO: 17), APSNSTA (SEQ ID NO: 15), and SPALKTV (SEQ ID NO: 16), wherein the length of the polypeptide is up to 30 amino acids, the polypeptide is capable of binding to dendritic cells, and ~~wherein said~~ the polypeptide is not a full-length naturally-occurring protein.

Applicant accepted the amendment.

The Examiner requested that Applicant file a substitute specification in order to place the application in compliance with the Sequence Rules. Applicant agreed. Specifically, at least pp. 2-29, 50, 51, 63 and 66-68 and Tables 2 and 3, and Tables 2-4 on p.66 were cited by the Examiner as containing sequences that require sequence identifiers.
